FOLDED LENGTH 27.94 LEG SEGMENTS 3, TWIST LOAD
CAPACITY 115 LBS LEG DIA 32MM X 1.2MM LEG ANGLE
LOCKS YES (PATENT PENDING TITAN LEG LOCK SYSTEM)**

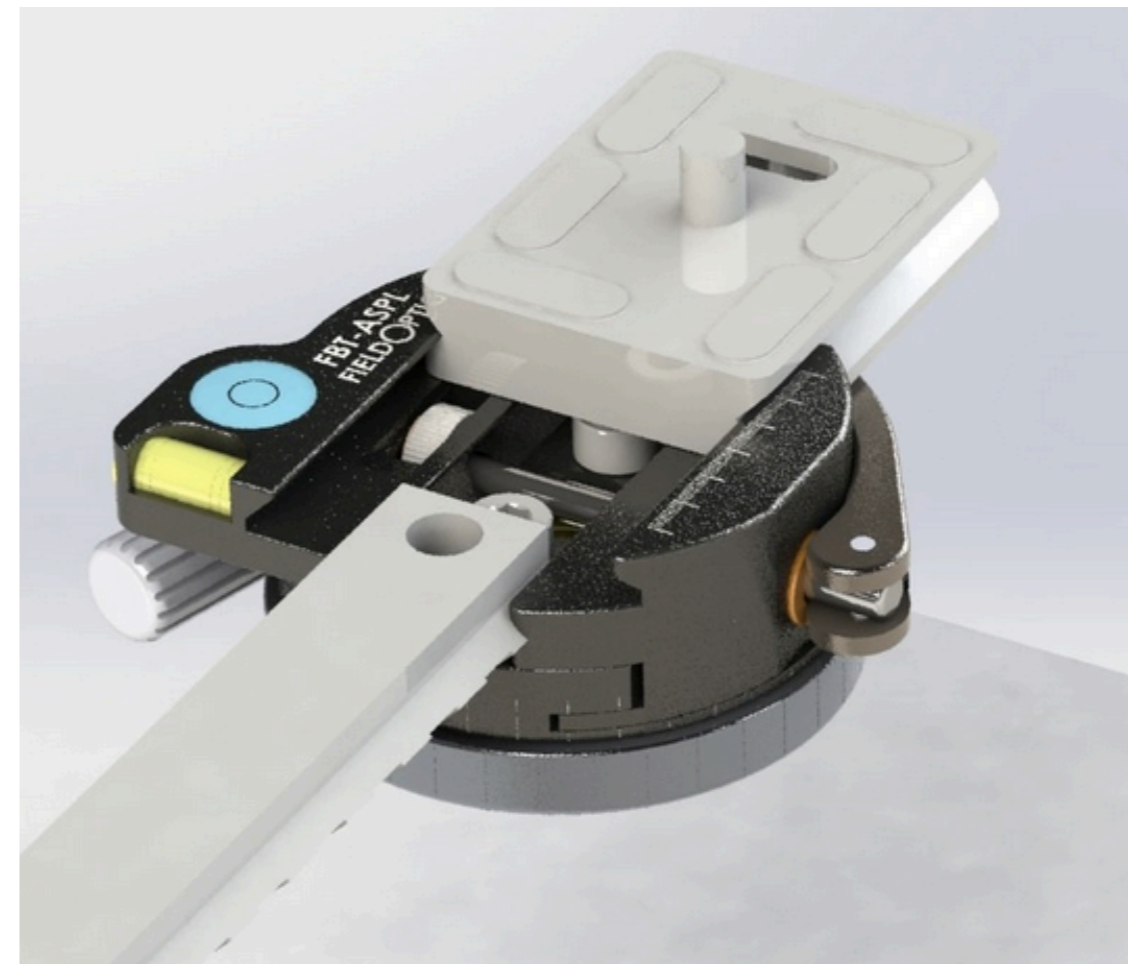

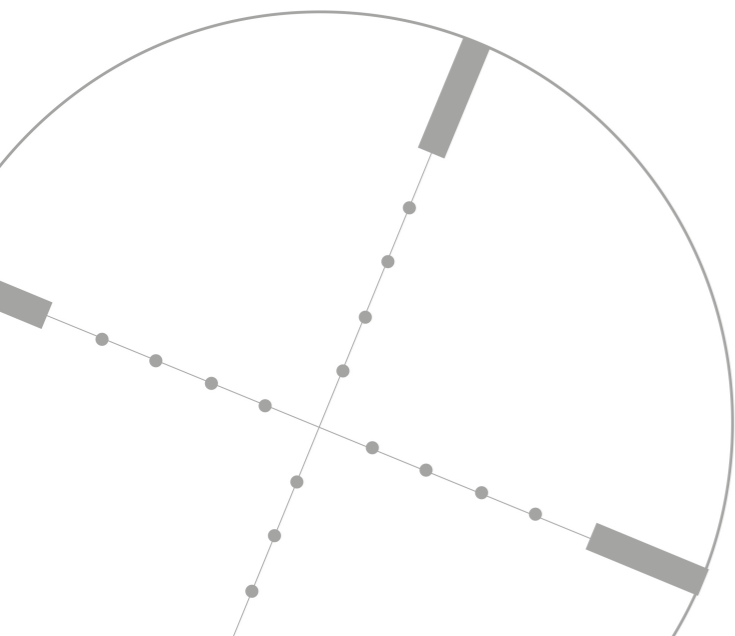

PRODUCT DESCRIPTION

This complete System includes a professional military grade, Made in the USA, PRO32-MIL carbon fibre tripod with the new patent pending Titan Leg Lock System™ , an Arca Swiss-F-Picatinny Lever Clamp™ FBT-ASFPL, a Precision Bowl Tensioner™ handle FPBT-LH, & a FREE 50mm QR50 Arca Swiss QR plate. This unique technology is the next generation bowl type tripod design that eliminates the need for an added head because the head system is built directly into the frame of the tripod. The precision bowl tension system provides both full dynamic range of motion or a fully locked static position. The result is a stronger, lighter and more accurate system compared to traditional bowl top designs. The PRO32 has 3 removable legs for greater storage and packing capability. Legs can convert to ultra-strong trekking poles and shooting sticks. Legs have extra strong 10-layer 32 mm x 1.2mm leg tube with twice the bending strength of other legs. They also include o-ring sealed twist locks for fast silent action and to protect against dirt and moisture. The Arca Swiss F-Picatinny Lever Clamp System provides +/- 20° fluid feel dynamic pitch and 360 independent pan axis rotation. The ASFPL has a dual acting lever clamp with a precision tension control knob that compensates for any size Arca or Picatinny rail. Includes a Pro Series tactical padded carry case & shoulder sling strap, Black. Tripod can also convert from 75mm bowl top to flat top or accept optional center tube riser assemblies.

ARCA SWISS-PICATINNY LEVER CLAMP WITH PAN AXIS

Arca Swiss-Picatinny Lever Clamp is a multi function mount system that connects directly to an FBT-LB levelling base with an interlocking face groove and an external retention clamp to provide smooth pan rotation and shock absorption. Capable of mounting Arca Swiss or Picatinny Rail system directly without the need for a QR head plate. Adjustable tension side lever clamp for quick connect and release. The independent pan axis allows smooth panning without releasing the levelling base. Top plane bubble level, and vertical tilt level assures weapon is perfectly upright for PRS & LR shooting. Configurable shock retention pins for Arca Swiss plates.

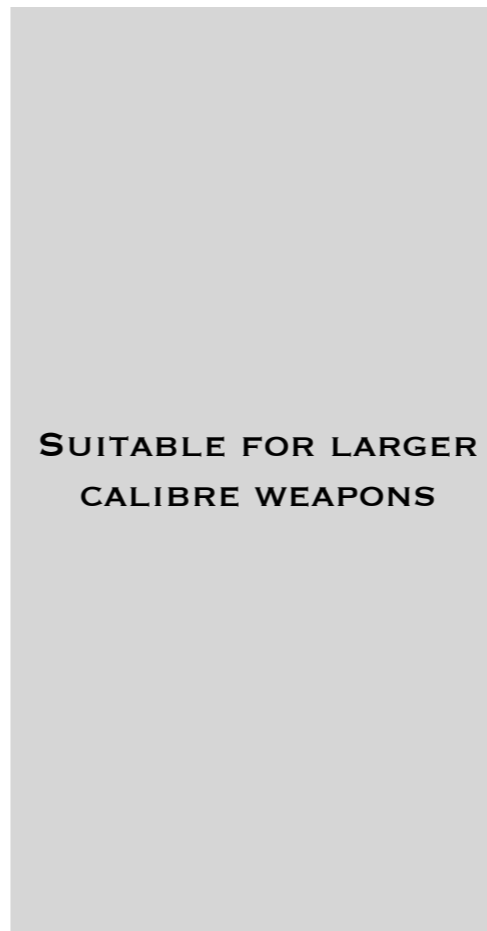

PRODUCT SPECIFICATIONS

Specifications:

Weight:	5.5 lbs
Max Height	58.3
Min Working Height	4.75
Bowl Diameter	75mm
Folded length	23.7
Leg Segments:	3, twist
Load Capacity	115 lbs
Leg Dia:	32mm x 1.2mm
Leg Angle Locks	Yes
Detachable Legs	3

COMPATIBLE WITH XMOUNT®
